The Model 59E EZ-Glide Evacuation Chair helps you quickly and safely transport a seated passenger down stairs and over flat surfaces in an evacuation situation. Belted tracks enable operators to “glide” the chair down stairs instead of carrying it.

The durable Model 59E EZ-Glide Evacuation Chair can carry up to 500 lb (227 kg). It is available in a manual version or a power version that features POWERTraxx®. The powered track system carries all of the weight, up to 500 lb, up or down stairs. This greatly reduces operator strain and increases operator and passenger safety.

- 15-year warranty
- Power or manual track system available
- The manual track system glides the weight down stairs, allowing one person to evacuate individuals up to 200-lb or two people to evacuate individuals up to 500 lb
- POWERTraxx Conversion Kit can retrofit powered tracks to the manual Model 59E EZ-Glide Evacuation Chair at any time
- 500-lb weight capacity accommodates larger passengers
- Two Model 430P two-piece restraints and one ankle restraint are included

Safely glides passengers down stairs, reducing operator strain and improving passenger and operator safety

Five-position lift bar and handles adjust to operator height

Easy to follow visual instructions are placed on the seatback so any person can quickly deploy the chair in an emergency
Model 59E EZ-Glide® Evacuation Chair
